There can be no assurance that these litigations will be decided in favour of our Company and our Group Companies, respectively, and consequently it may divert the attention of our management and Promoter and waste our corporate resources and we may incur significant expenses in such proceedings and may have to make provisions in our financial statements, which could increase our expenses and liabilities. If such claims are determined against us, there could be a material adverse effect on our reputation, business, financial condition and results of operations, which could adversely affect the trading price of our Equity Shares. For

the details of the cases please refer the chapter titled “Outstanding Litigations and Material Developments” on page 188 of this Draft Prospectus.

- 2. We do not have long-term agreements with most of our suppliers or customers and the loss of one or more of them or a reduction in their demand for our products could adversely affect our business, results of operations, financial condition and cash flows. Further, our inability to accurately forecast demand for our products or manage our inventory or working capital requirements may have an adverse effect on our business, results of operations and financial condition.**

The primary raw materials used for our manufacturing process are Hot Rolled Coils, Cold Rolled Coils, Thinner size C R Strips & Stainless Steel. All the raw materials are purchased from third parties except Cold Rolled Coils mainly used for the manufacturing of Flexible Hose pipes and we procure the same from our Cold Rolled Division.

Initially in past financial years i.e. financial year 2022, 2021 & 2020, we have entered a supplier’s agreement with Jindal Stainless Hisar Limited, Hisar (“Jindal”) for the raw material supply i.e. Hot Rolled Coils, Cold Rolled Coils & HR/ CR strips. The main condition was that we will purchase at least 95.00% of our raw material consumed from Jindal & rest 5.00% we can purchase from other suppliers. In April 2022, our Company & Jindal mutually decided to amend the agreement & lift the restriction that bind us to purchase 95.00% raw material from Jindal, now we can purchase raw material from any suppliers.

Now, we do not have any long-term supply contracts with any of our suppliers with respect to our raw material requirements and typically place orders with them in advance of our anticipated requirements. We believe that efficient inventory management is a key component of the success of our business, results of operations and profitability and to that end we maintain a reasonable level of inventory of raw materials, work in progress and finished goods at our manufacturing facility. While we forecast the demand and price for our products and accordingly, plan our production volumes, any error in our forecast due to inter alia the domestic scale of our operations and demand for our products, could result in a reduction in our profit margins and surplus stock, which may result in additional storage cost and such surplus stock may not be sold in a timely manner, or at all.

We typically do not enter into long-term agreements with most of our customers. Our relationship with our customers is generally on a non-exclusive basis and accordingly, our customers may choose to cease sourcing our products and choose to source alternative options. Therefore, we cannot assure that we will receive repeat orders from our customers in the future. Additionally, our customers have high and stringent standards for product quantity and quality as well as delivery schedules. Any failure to meet our customers’ expectations and specifications could result in the cancellation or non-renewal of contracts. There are also a number of factors, other than our performance, that could cause the loss of a customer such as:

- a) increase in prices of raw materials and other input costs;
- b) changes in consumer preferences;
- c) changes in governmental or regulatory policy, etc.

Any of these factors may have an adverse effect on our business, results of operations and financial condition. Further, absence of any contractual exclusivity with respect to our business arrangements with such customers poses a threat on our ability to be able to continue to supply our products to these customers in the future. If we overestimate demand, we may incur costs to purchase more raw materials and manufacture more products than required.

Accordingly, we face the risk that our customers might not place any order or might place orders of lesser than expected size or may even cancel existing orders or make change in their policies which may result in reduced quantities being manufactured by us. Cancellations, reductions or instructions to delay production

(thereby delaying delivery of products manufactured by us) by a significant customer could adversely affect our results of operations by reducing our sales volume, as well as by possibly causing delay in our customers' paying us for the order placed for purchasing the inventory with us which we would have manufactured for them. We may not find any customers or purchasers for the surplus or excess capacity in which case we would be forced to incur a loss.

In addition, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, personnel requirements and other resource requirements, based on our estimates of customer orders. If we underestimate demand, we may manufacture fewer quantities of products than required, which could result in the loss of business. We may fail to maintain the requisite inventory, which may adversely impact our ability to deliver products to customers in a timely manner which may lead to loss of revenues or customers. Our inability to accurately forecast demand for our products and manages our inventory may have an adverse effect on our business, results of operations and financial condition.

3. Any increase in the cost of our raw material or other purchases or a shortfall in the supply of our raw materials, may adversely affect the pricing and supply of our products and have an adverse effect on our business, results of operations and financial condition.

The success of our operations depends on a variety of factors, including our ability to source raw materials at competitive prices. For the six-month period ended September 30, 2022 and in Fiscals 2022, 2021 and 2020, our cost of raw materials consumed constituted 82.91%, 88.61%, 81.44% and 85.77%, respectively, of our total expenses which amounted to Rs. 10,326.64 Lakhs, Rs. 17,808.98 Lakhs, Rs. 12,304.18 Lakhs and Rs. 15,079.18 Lakhs, respectively. Raw material supply and pricing can be volatile due to a number of factors beyond our control, including demand and supply, general economic and political conditions, transportation and labour costs, natural disasters, pandemic, competition and there are inherent uncertainties in estimating such variables, regardless of the methodologies and assumptions that we may use.

We seek to source our raw materials from reputed suppliers and typically seek quotations from multiple suppliers. We typically do not enter into long-term agreements with our suppliers. We may be required to track the supply demand dynamics and regularly negotiate prices with our suppliers in case of significant fluctuations in raw material prices or foreign currency fluctuations.

Further, we procure a large portion of our raw materials from a few key suppliers, any disruption of supply of raw materials from such suppliers could adversely impact our operations and business if we are unable to replace such suppliers in a timely manner. Cost of raw materials sourced from Jindal Stainless Hisar Limited, Hisar accounted for approx. 90.59%, 99.00%, 99.00% and 99.00% of the total cost of raw materials consumed during the six-month period ended September 30, 2022 and for Fiscals 2022, 2021 and 2020 which was to Rs. 8,561.46 Lakhs, Rs. 15,780.44 Lakhs, Rs. 10,020.79 Lakhs and Rs. 12,933.27 Lakhs, respectively. We cannot assure you that we will be able to enter into new arrangements with suppliers on terms acceptable to us, which could have an adverse effect on our ability to source raw materials in a commercially viable and timely manner, if at all, which may impact our business and profitability. We are also subject to the risk that one or more of our existing suppliers may discontinue their operations, which may adversely affect our ability to source raw materials at a competitive price. Additionally, there can be no assurance that demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials.

If we were to experience a significant or prolonged shortage of raw materials from any of our suppliers, and we cannot procure the raw materials from other sources, we would be unable to meet our production schedules for our key products and to deliver such products to our customers in a timely manner, which would adversely affect our sales, margins and customer relations. Therefore, we cannot assure you that we will be able to procure adequate supplies of raw materials in the future, as and when we need them and on commercially acceptable terms.

Further, any increase in raw material prices may result in corresponding increases in our product costs. While we typically sell our products to our customers on a short-term contracts basis, given that we have long term relationships with many of our customers, our ability to pass on any increases in the costs of raw materials and other inputs to our customers may be limited. There may be a significant difference in the price of raw materials when raw materials are ordered and paid for and the prevailing price when the raw materials are received and we may not be able to pass on the difference in the prices to our customers. A failure to maintain our required supply of raw materials, and any inability on our part to find alternate sources for the procurement of such raw materials, on acceptable terms, could adversely affect our ability to deliver our products to our customers in an efficient, reliable and timely manner, and consequently adversely affect our business, results of operations and financial conditions.

4. The Company is dependent on few numbers of customers. Any loss of top 10 customers will significantly affect our revenues and profitability.

For the period ended September 30, 2022 & year ended March 31, 2022:

(Rs. In Lakhs)

Particular	Standalone	Standalone
	September 30, 2022	March 31, 2022
Revenue from Operations	10,445.27	17,978.58
Top 10 Customers contribute	6,623.16	9,216.46
% of total Revenue	63.41	51.26

Although, we have long term relationships with some of our customers, we have not entered into long-term agreements with them and the success of our business is significantly dependent on us maintaining good relationships with our customers. The actual sales by our Company may differ from the management estimates and the loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. There can be no assurance that we shall be able to maintain historic levels of business and/or negotiate and execute long-term contracts on terms that are commercially viable with our significant customers or that we shall be able to significantly reduce customer concentration in the future.

5. Failure to recover amounts from our Sundry Debtors/Trade Receivables on a timely manner might affect our financial conditions.

As of audited financial statement for the period ended September 30, 2022 and year ended March 31, 2022:

(Rs. In Lakhs)

Particular	Standalone	Standalone
	September 30, 2022	March 31, 2022
Trade Receivables	3,297.74	3,356.75
Top 10 Debtors contribute	20,36.26	20,03.83
% of Total Trade Receivables	61.75%	59.70%

If we are unable to recover balance amount in a timely manner it might affect our financial conditions and profitability.

6. Our manufacturing activities are dependent upon availability of skilled and unskilled labours.

We do not have any permanent arrangement of labour and recruitments are made as per requirements except for those who are on permanent pay rolls of our Company. As on the date of this Draft Prospectus, we have more than 80 permanent pay rolls labour. Our manufacturing activities are dependent on availability of

skilled and unskilled labour. Non-availability of labour at any time or any disputes with them may affect our production schedule and timely delivery of our products to customers.

Further, we spend significant time and resources in training the manpower we hire. Our success is substantially dependent on our ability to recruit, train and retain skilled manpower. High attrition and competition for manpower may limit our ability to attract and retain the skilled manpower necessary for our future growth requirements. We cannot assure you that skilled manpower will continue to be available in sufficient numbers suitable to our requirements or that we will be able to grow our workforce in a manner consistent with our growth objectives, which may affect our business, financial condition, results of operations and prospects.

7. Our Capacity utilisation was lower in past years.

Since our company is into manufacturing business, the capacity utilisation is an important factor to determine the strength and potential output that can be produced if capacity was fully used.

For C R Coils/Strips

(In Metric Tonnes)

Capacity Utilisation	March 31, 2022	March 31, 2021	March 31, 2020
Installed Capacity	12,000	12,000	12,000
Actual Production	7,258	7,276	9,752
% Utilisation	60.48%	60.63%	81.27

For Hose Pipes

(In Meters)

Capacity Utilisation	March 31, 2022	March 31, 2021	March 31, 2020
Installed Capacity	2,00,000	2,00,000	2,00,000
Actual Production	1,70,000	1,60,000	1,85,000
% Utilisation	85.00%	80.00%	92.50%

We have seen the downward in our actual production in past years as compared to installed capacity of plant and machinery for production. For C R Coils/Strips it was 60.48% for the year ending March 31, 2022 and 60.63% for year ended March 31, 2021 and for Hose Pipes it was 85.00% for the year ending March 31, 2022 and 80.00% for year ended March 31, 2021. However, in the financial year 2019-20, we achieved 81.27% capacity utilization for CR Coils/Strips & 92.50% for Hose Pipes. Due to covid -19 our actual production seen the downward in last 2 financial years. Although the revenue has been increased in FY 2021-22 by 45.01%. We cannot assure you that in future this trend continues, this could adversely affect our business operations.

8. A portion of our revenues and expenses are denominated in foreign currencies. As a result, we are exposed to foreign currency exchange risks and regulatory changes in foreign exchange management which may adversely impact our results of operations.

Apart from our operations in India of which our sales are denominated in Indian Rupees, we also sell our Products in several other countries and receive payments in foreign currencies. Fluctuation in foreign currencies exchange rates could have adverse effects on our business, results of operations and financial condition. We export our products i.e. Cold Rolled Coils & Strips and flexible house pipes, mainly to Germany, U. K., Philippines, Sri Lanka, Turkey, Poland and Bogota Colombia. Our export constituted 2.26%, 5.73%, 5.87%, and 2.14% of our total revenue for the six-month period ended September 30, 2022 and Fiscals 2022, 2021 and 2020, respectively.

Although in the Fiscals 2022 & 2020 there were net foreign currency exchange gains aggregating to Rs. 7.27 lakhs and Rs. 0.95 lakhs respectively, there can be no assurance that we shall not be subject to such foreign currency exchange losses in the future. Depreciation of the Indian Rupee against such international currencies may have an adverse effect on our total profit.

Certain markets in which we sell our Products may be subject to exchange control risks, which may result in either delayed recovery or even non-realization of revenue. In addition, the policies of the RBI may also change from time to time, which may limit our ability to effectively hedge our foreign currency exposures and may have an adverse effect on our results of operations and cash flows.

9. Our operations are subject to high working capital requirements. Our inability to maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet requirement of working capital, could adversely affect our operations.

Our business is working capital intensive and hence, trade receivables form a substantial part of our current assets and net worth. Our trade receivables as on September 30, 2022 & March 31, 2022 were Rs. 3,297.74 lakhs and 3,356.75 Lakhs respectively and inventories were Rs. 1,339.72 lakhs & Rs.1,922.37 Lakhs. Thus, major portion of our working capital is utilized towards debtors and inventory. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and dealers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the credit worthiness of our customers, it may lead to bad debts, delays in recoveries and / or write-offs which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations.

There exist substantial requirement of working capital and financing in the form of fund and non-fund based working capital facilities to meet our requirements. The details of our working capital in last 3 years are as under which is showing continuous increase:

(Rs. In Lakhs)

Particulars	September 30, 2022 (Actual)	Fiscal 2022 (Actual)	Fiscal 2021 (Actual)	Fiscal 2020 (Actual)
Current Assets				
Inventories	1,339.72	1,922.37	1,303.31	1,513.83
Trade Receivables	3,297.74	3,356.75	2,785.72	2,553.77
Short-term Loans and Advances	6.53	20.88	53.78	14.07
Other Current Assets	199.95	214.31	116.02	201.27
Total Current Assets (A)	4,843.94	5,514.31	4,258.83	4,282.94
Current Liabilities				
Trade Payables	261.82	380.92	9.49	251.15
Other Current Liabilities	173.09	222.41	152.23	100.49
Total Current Liabilities (B)	434.91	603.33	161.72	351.64
Total Working Capital Requirements (A-B)	4,409.03	4,910.98	4,097.11	3,931.30
Funding Pattern				
Working Capital Funding from Banks and Financial Institutions	2,677.59	3,199.24	2,745.53	2,748.06
Internal Accruals and Unsecured Loans	1,731.44	1,711.74	1,351.58	1,183.24

A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability. The significant amount of working capital and major

portion of our working capital is utilized towards inventories and trade receivables. Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. We would require additional working capital facilities in the future to satisfy our working capital need which is proposed to be met through the IPO proceeds. In case of our inability to obtain the requisite additional working capital finance, our internal accruals/ cash flows would be adversely affected to that extent, and consequently affect our operations, revenue and profitability.

10. A shortage or unavailability of electricity or water could affect our manufacturing operations and have an adverse effect on our business, results of operations and financial condition.

Our manufacturing operations require continuous supply of electricity, for which we depend on Dakshin Haryana Bijli Vitran Nigam (DHBVN). For the Manufacturing Facility, we have a connected load of 1600 KVA from Dakshin Haryana Bijli Vitran Nigam (DHBVN). Further, we have a power backup at our Manufacturing Facility through a DG set supporting our critical manufacturing operations. Any shortage or non-availability of electricity or failure of the state electricity grid could delay our operations at the Manufacturing Facility which may consequently adversely affect our delivery timelines to our customers. Any such delay may have an adverse effect on our business, results of operations and financial condition.

Further, we require regular water supply for our manufacturing processes which is currently being sourced from private water tanker suppliers. Although, we have not witnessed any major shortfall in supply of water, we do not have long-term supply arrangements with these suppliers, and there can be no assurance that we shall be able to secure our water requirements through these suppliers in a timely manner or at all. Any shortage or non-availability water supply could delay our operations at the Manufacturing Facility which may consequently adversely affect our delivery timelines to our customers. Any such delay may have an adverse effect on our business, results of operations and financial condition.

11. Our operations are labour intensive and our manufacturing operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or those of our suppliers.

Our operations are labour intensive and we are dependent on a large labour force for our manufacturing operations. As of the date of this Draft Prospectus, we have 157 permanent employees. The success of our operations depends on availability of labour and maintaining good relationship with our workforce. Shortage of skilled/ unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. While we have not experienced any major prolonged disruption in our business operations due to disputes or other problems with our work force in the past, there can be no assurance that we will not experience any such disruption in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs. While there have been no strikes by employees in the past, we cannot assure that there will be no strikes or participation of our labour or employees in such strikes.

Further, we may engage independent contractors through whom we can engage contract labour for performance of certain functions at our manufacturing unit as well as at our offices on assignment basis. Although we do not engage these labourers directly, we are responsible for any wage payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and our financial condition. India has stringent labour legislation that protects the interests of workers, including legislation that sets forth detailed procedures for the establishment of unions, dispute resolution and employee removal and legislation that imposes certain financial obligations on employers upon retrenchment. We are also subject to laws and regulations governing relationships with employees, in such areas as minimum wage and

maximum working hours, overtime, working conditions, hiring and terminating of employees and work permits.

12. The demand in the steel and steel products industry is volatile and a decrease in demand of steel may have a material adverse effect on our business, results of operations, prospects and financial condition.

Cold Rolled Coils & Strips fluctuate based on a number of factors, such as, the availability and cost of raw material inputs, fluctuations in domestic and international demand and supply of steel and steel products, international production and capacity, fluctuation in the volume of steel imports, transportation costs, protective trade measures and various social and political factors, in the economies in which the steel producers sell their products and are sensitive to the trends of particular industries, such as, the construction and machinery industries. When downturns occur in these economies or sectors, which may lead to a decrease in steel and steel product prices, and consequently we may experience decreased demand for our Products. This may, in turn, have a material adverse effect on our business, results of operations, financial condition and prospects.

13. The pricing in the steel industry is subject to market demand, volatility and economic conditions. Fluctuations in steel prices may have a material adverse impact on our business, results of operations, prospects and financial conditions.

Low steel prices adversely affect the businesses and results of operations of steel product producers generally, including ours, resulting in lower revenue and margins and write-downs of products and raw material inventories. Further, substantial decreases in steel and steel product prices during periods of economic weakness have not always been balanced by commensurate price increases during periods of economic strength. Any sustained price recovery shall require a broad economic recovery, in order to underpin an increase in real demand for steel and steel products by end users. In addition, the volatility, length and nature of business cycles affecting the steel and steel products industry may become increasingly unpredictable, and the recurrence of another major downturn in the industry may have a material adverse impact on our business, results of operations, financial condition and prospects.

14. We rely on our Manufacturing Facility in Hisar, Haryana, India as our only Manufacturing Facility and any adverse developments affecting this facility and the region could have an adverse effect on our business, results of operations and financial condition.

We currently operate only one Manufacturing Facility for manufacturing all of our Products, which is located in Hisar, Haryana, India. For details, see “Business - Description of Our Business - Our Operations – Manufacturing”. Our Manufacturing Facility is subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output, efficiency, labour disputes, strikes, environmental issues, lockouts, non-availability of services of our external contractors etc. Further, any significant malfunction or breakdown of our machinery or equipment at the Manufacturing Facility may entail significant repair and maintenance costs and cause delays in our operations. In the event that we are forced to shut down our Manufacturing Facility for a significant period of time, it would have a material adverse effect on our earnings, our results of operations and our financial condition as a whole.

Our business is dependent on our ability to manage our Manufacturing Facility, including productivity of our workforce, compliance with regulatory requirements and those beyond our control, such as the breakdown and failure of equipment or industrial accidents and severe weather conditions and natural disasters. Our inability to effectively respond to any slowdown or shutdown and to rectify any disruption, in a timely manner and at an acceptable cost, could also lead to an inability to comply with our customers’ requirements and would result in us breaching our contractual obligations. Any disruption to the operations at our Manufacturing Facility may result in an adverse effect on our business, results of operations and financial condition. In addition, any significant social, political or economic disruption, or natural calamities

or civil disruptions or breakdown of services and utilities in the region where Manufacturing Facility is located, or changes in the policies of the state or local governments of such region, may require us to incur significant capital expenditure, or change our business structure or strategy, which could have an adverse effect on our business, results of operations and financial condition.

15. Our insurance coverage may not be adequate to protect us against all potential losses to which we may be subject to and this may have a material adverse effect on our business.

We have Insurance cover which may not be adequate to cover all our losses or liabilities that may arise from our operations. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance has been availed. For further details, kindly refer chapter titles “Our Business” on Page 105.

16. Our indebtedness and the restrictions imposed by our financing agreements could adversely affect our ability to conduct our business and operations.

As of period September 30, 2022, we had total outstanding borrowings including short-term & long term of Rs. 4,035.70 Lakhs. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our business. Our financing agreements contain certain restrictive covenants that limit our ability to undertake certain types of transactions. In the event that we breach a restrictive covenant, our lenders could deem us to be in default and seek early repayment of loans. An event of default would also affect our ability to raise new funds or renew maturing borrowings as needed to conduct our operations and pursue our growth initiatives. Although we have received consents from our lenders for the Fresh Issue, these restrictive covenants may affect some of the rights of our Shareholders.

17. Our Company may in the future avail, unsecured loans that may be recalled by the lenders at any time.

As on September 30, 2022 we had Rs. 150.00 Lakhs as unsecured loans with the interest of 12% PA from our shareholder. Our Company may in the future avail, unsecured loans which may be recalled by the lenders at any time. In the event that any lender seeks a repayment of any such loan, then Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. Moreover, our Company may not have adequate working capital to continue our operations. As a result, any such demand may affect our business, and in turn may affect our cash flows and results of operations.

For further details please refer chapter titled “Financial Information” beginning on Page 168.

18. Our Promoter & Promoter Group have provided personal guarantees to secure certain of our loan facilities, which if revoked or invoked may require alternative guarantees, repayment of amounts due or termination of the facilities.

Our Promoter & Promoter Group have provided personal guarantees in relation to certain of our loan facilities and may continue to provide such guarantees after the listing of the Equity Shares pursuant to the Issue. In the event that any of these guarantees are revoked or invoked, the lenders for such facilities may require alternate guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facilities, as applicable. We may not be successful in procuring alternative guarantees satisfactory to the lenders, and as a result, may need to repay outstanding amounts under such facilities or seek additional sources of capital, which may not be available on acceptable terms or at all. Any such failure to raise additional capital could adversely affect our operations and our financial condition.

For further details, kindly refer chapter titles “Financial Statements” on Page 168.

19. Our Company has entered into certain related party transactions and may continue to do so in the future.

Our Company has entered into related party transactions with our Promoter Group aggregating to Rs. 823.89 Lakhs & Rs. 2,421.60 Lakhs for the period ended on September 30, 2022 & year ended March 31, 2022 respectively. While our Company believes that all such transactions have been conducted on the arm’s length basis, there can be no assurance that it could not have been achieved on more favorable terms had such transactions not been entered into with related parties. Furthermore, it is likely that our Company will enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation.

20. We have certain contingent liabilities, which, if materialized, may affect our financial condition and results of operations.

If a significant portion of these liabilities materialize, it could have an effect on our results of operations and financial condition. Further, there can be no assurance that we will not incur similar or increased levels of contingent liabilities in the future.

21. Non-availability of initial period secretarial/ statutory records of the company filed with ROC since incorporation.

Since the company was incorporated in 1990, it is not possible to trace all secretarial records since incorporation. We are unable to trace copies of certain records. However, we have taken the data from registers & minutes maintained by the Company from 1990 to 2005. We cannot assure you that the filings were made in a timely manner and that we shall not be subject to any penalty imposed by the regulatory authorities in this respect.

22. We have experienced negative cash flows in relation to our operating, investing and financing activities in the last three financial years. Any negative cash flows in the future would adversely affect our results of operations and financial condition.

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow, it may adversely affect our business and financial operations. We experienced negative cash flows in the following periods as indicated in the table below:

(Rs. In Lakhs)

Particulars	Six-month period ended September 30, 2022	Year ended March 31, 2022	Year ended March 31, 2021	Year ended March 31, 2020

Net cash used/ generated from financing activities	(962.57)	353.93	(319.12)	(535.92)
Net increase/(decrease) in cash and cash equivalent	(8.23)	(43.04)	76.92	(20.68)

There can be no assurance that our net cash flows shall be positive in the future. Any negative cash flows in the future over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance and results of operations could be materially and adversely affected. For further details, see “Financial Statements” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on pages 168 and 175, respectively.

Any mishandling of our equipment and machineries could also lead to serious and sometimes fatal accidents. These accidents can cause personal injury and loss of life, severe damage to and destruction of property and equipment, environmental damage and may result in the suspension of operations and the imposition of civil and criminal liabilities. Liabilities incurred as a result of these events have the potential to adversely impact our financial position and reputation. Events like these could result in liabilities, or adversely affect our reputation with suppliers, customers, regulators, employees and the public, which could in turn affect our financial condition and business performance.

25. Some of our Group Companies have incurred Profit/losses during recent financial years.

26. Our Promoters play key role in our functioning and we heavily rely on their knowledge and experience in operating our business and therefore, it is critical for our business that our promoters remain associated with us. Our success also depends upon the services of our key managerial personnel and our ability to attract and retain key managerial personnel and our inability to attract them may affect our operations.

If our Promoter is unable or unwilling to continue in his present position, we may not be able to replace them easily or at all. Further, we rely on the continued services and performance of our key executives and senior management for continued success and smooth functioning of the operations of the Company. If we lose the services of any of our key managerial personnel, we may be unable to locate suitable or qualified replacement, and may incur additional expenses to recruit and train new personnel, which could adversely affect our business operations and affect our ability to continue to manage and expand our business. Our Promoters, along with the key managerial personnel, have over the years-built relations with various customers and other persons who are form part of our stakeholders and are connected with us. The loss of their services could impair our ability to implement our strategy, and our business, financial condition, results of operations and prospects may be materially and adversely affected.

27. We may not be successful in implementing our business and growth strategies.

The success of our business depends substantially on our ability to implement our business and growth strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers/projects. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Further, our growth strategies could place significant demand on our management team and other resources and would require us to continuously develop and improve our operational, financial and other controls, none of which can be assured. Failure to implement our business and growth strategies would have a material adverse effect on our business and results of operations.

28. We require certain approvals or licenses in the ordinary course of business and the failure to renew, obtain or retain them in a timely manner, or at all, may affect our operations.

We require certain statutory and regulatory permission, licenses and approvals to operate our business. We believe that we have obtained all the requisite permission and licenses which are adequate to run our

business. However, there is no assurance that there are no other statutory/regulatory requirements which we are required to comply with. Further, some of these approvals are granted for fixed periods of time and need renewal from time to time. We are required to renew such permission, licenses and approvals. Any default by our Company in complying with the same, may result in inter alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

29. Changes in latest technology or requirement of machinery based on business opportunity may adversely affect Our Company's results of operations and its financial condition.

Modernization and technology upgradation are essential to reduce costs and increase the output. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Presently we are using software's for designing, with the latest technological standards however in future we may be required to implement new technology or upgrade the software and other equipment's employed by us. Further, the costs in upgrading our technology and modernizing the software may be significant which could substantially affect our finances and operations. Also, the cost of implementing new process as well as R & D would require substantial new capital expenditures and could adversely affect our business, prospects, results of operations and financial condition.

30. We are exposed to the risk of delays or non-payment by our clients and other counterparties, which may also result in cash flow mismatches.

We are exposed to counter party credit risk in the usual course of our business dealings with our clients or other counterparties who may delay or fail to make payments or perform their other contractual obligations. The financial condition of our clients, business partners and other counterparties may be affected by the performance of their business which may be impacted by several factors including general economic conditions. We also cannot assure you that we will be able to collect the whole or any part of any overdue payments. For further details of our Business and Clients.

31. If we are unable to attract new customers or retain our existing customers the growth of our business and cash flows will be adversely affected.

To increase our revenue and cash flows, we must regularly add new customers. Post this Issue, our Promoter and Promoter Group will collectively own majority of our equity share capital. As a result, our Promoter, together with the members of the Promoter Group, will continue to exercise a significant degree of influence over Company and will be able to control the outcome of any proposal that can be approved by a majority shareholder vote, including, the election of members to our Board, in accordance with the Companies Act, 2013 and our Articles of Association. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control of our Company.

In addition, our Promoter will continue to have the ability to cause us to take actions that are not in, or may conflict with, our interests or the interests of some or all of our creditors or other shareholders, and we cannot assure you that such actions will not have an adverse effect on our future financial performance or the price of our Equity Shares.

- 35. We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.**

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

- 36. There are several restrictive covenants in the loan agreements, which could influence our ability to expand, in turn affecting our business and results of operations.**

We have availed credit facilities from various banks exclusively. We have entered into agreements for term loans and financial facilities with our bankers and the covenants in borrowings from bank, among other things require us to obtain permissions in writing in respect of, including, but not limited to effecting any change in the management/Board of the Company, transfer of controlling interest, capital structure of the Company; undertake any new project, implement any scheme of expansion or acquire fixed assets/machinery, enter into borrowing arrangement either secured or unsecured with any other bank/financial institution/Company or otherwise; except which are approved by Bank/lenders, formulate any scheme of amalgamation, acquisition, merger, or reconstruction etc. Our Company has applied for the NOC

from bankers which is Kotak Mahindra Bank Limited, Axis Bank Limited and ICICI Bank Limited, however the approval from the banks are still under process.

37. Our inability to manage growth could disrupt our business and reduce profitability.

A principal component of our strategy is to continuously grow by expanding the capacity, size and geographical scope of our businesses. This growth strategy will place significant demands on our management, financial and other resources. It will require us to continuously develop and improve our operational, financial and internal controls. Continuous expansion increases the challenges involved in financial management, recruitment, training and retaining high quality human resources, preserving our culture, values and entrepreneurial environment, and developing and improving our internal administrative infrastructure. Any inability on our part to manage such growth could disrupt our business prospects, impact our financial condition and adversely affect our results of operations.

38. Our future funds requirements, in the form of fresh issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any fresh issue of shares or convertible securities would dilute the shareholding of the existing shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing shareholders. If such funds are raised in the form of loans or debt, then it may substantially increase our interest burden and decrease our cash flows, thus prejudicially affecting our profitability and ability to pay dividends to our shareholders.

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements.

46. Fraud, theft, employee negligence or similar incidents may adversely affect our results of operations and financial condition.

Our operations may be subject to incidents of theft or damage to inventory in transit and prior to or during godown stocking. While we have not experienced any instance of theft, fraud, employee negligence and resultant loss in the past, the business may encounter some inventory loss on account of employee theft, vendor fraud and general administrative error, in the future.

There can be no assurance that we will not experience any fraud, theft, employee negligence, security lapse, loss in transit or similar incidents in the future, which could adversely affect our results of operations and financial condition. We cannot assure you that our Promoter and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

48. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant’s decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the

right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

49. The determination of the Issue Price is based on various factors and assumptions and the Issue Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Issue.

The determination of the Issue Price is based on various factors and assumptions and will be determined by our Company and the Lead Manager. Furthermore, the Issue Price of the Equity Shares will be determined by our Company in consultation with the Lead Manager through the Book Building Process. These will be based on numerous factors, including factors as described under "Basis for Offer Price" on page 89 and may not be indicative of the market price for the Equity Shares after the Issue.

50. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

As a listed Indian entity, there are provisions in Indian law that may delay or prevent a future takeover or change in control of our Company. Under the Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions require certain compliances, such as undertaking an open offer, which may prevent a potential acquirer from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, it is possible that such a takeover would not be attempted or consummated.

51. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.

The Equity Shares will be listed on the Emerge platform of National Stock Exchange of India Limited ("NSE Emerge" or "Exchange"). There could be a failure or delay in listing of the Equity Shares on the Stock Exchange. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods as specified herein. We could also be required to pay interest at the applicable rates if allotment is not made, unblocking intimation/ refund intimation, as applicable are not dispatched or demat credits are not made to investors within the prescribed time periods.

52. The requirements of being a publicly listed company may strain our resources.

We are not a publicly listed company and have not, historically, been subjected to the compliance requirement or the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations, which will require us to file audited annual and unaudited half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

53. After the Issue, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop. Further, the price of the Equity Shares may be volatile, and you may be unable to resell the Equity Shares at or above the Issue Price, or at all.

An active trading market on the Stock Exchange may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. The Issue Price of the Equity Shares shall be determined through a book-building process and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

EXTERNAL RISK FACTORS

54. Natural or man-made disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19 and manmade disasters, including acts of war, terrorist attacks and other events, many of which are beyond our control caused by matters such as acts of God, strikes, civil commotion, riots, war, revolution, acts of governments, lack of adequate production capacity, failure or delay in plant start up, breakdown of machinery, shortage of raw materials, equipment, fuel, transportation, or containers, or any other cause whether similar or dissimilar to those enumerated that are reasonably beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India or states to who we sell our products could have a negative effect on us. Further, the ongoing Russia-Ukraine conflict may also have adverse impact on our supply chain. However, the long term risks associated with the conflict

is not clear as of the date of this Draft Prospectus. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. A worsening of the current outbreak of COVID-19 pandemic or future outbreaks of COVID-19 virus or a similar contagious disease could adversely affect the global economy and economic activity in the region. As a result, any present or future outbreak of a contagious disease could have a material adverse effect on our business and the trading price of the Equity Shares.

55. Any change in environmental laws and other applicable regulations, may adversely affect Our Company's results of operations and its financial condition.

End users of our services are majorly Central Government, State Government, Government Authorities, builders, constructors or real estate players. National Green Tribunal (NGT) has taken some strict decisions in respect to environment cases, if business of any of our client is affected due to these changes then it may adversely affect our business operations and revenue. Any Change in the Political environment in the Country may also lead to major change in our services.

56. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, change in regulatory framework, inflation, deflation, foreign exchange fluctuations, consumer credit availability, consumer debt levels, unemployment trends, terrorist threats and activities, worldwide military and domestic disturbances and conflicts, and other matters that influence consumer confidence, spending and tourism.

57. Terrorist attacks, communal disturbances, civil unrest and other acts of violence or war involving may adversely affect the financial markets and our business.

Terrorist attacks and other acts of violence or war may negatively affect the markets on which our Equity Shares trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, and adversely affect our business. Such incidents may also create a greater perception that investment in Indian companies involves a higher degree of risk and may have an adverse impact on our business and the price of our Equity Shares. Further, we cannot predict the effects on our business of heightened security measures, threatened terrorist attacks, efforts to combat terrorism, military action against a foreign state or other similar events. Any of these events could also negatively affect the economy and consumer confidence, which could cause a downturn in the service industry. In addition, any deterioration in the relations between India and its neighboring countries might result in investor concern about stability in the region, which could materially and adversely affect the price of our Equity Shares.

58. Any changes in the regulatory framework could adversely affect our operations and growth prospects.

Our Company is subject to various regulations and policies. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our

operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

59. Civil disturbances, extremities of weather, regional conflicts and other political instability may have adverse effects on our operations and financial performance.

Certain events that are beyond our control such as earthquake, fire, floods and similar natural calamities may cause interruption in the business undertaken by us. Our operations and financial results and the market price and liquidity of our equity shares may be affected by changes in Indian Government policy or taxation or social, ethnic, political, economic or other adverse developments in or affecting India.

60. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short-term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

61. Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.

Our Company currently prepares its annual financial statements under Indian GAAP. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company is required to prepare its financial statements in accordance with Ind AS. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the financial statements included in the Draft letter of offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the Draft letter of offer should accordingly be limited.

62. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

63. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

64. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

65. We are subject to risks arising from interest rate fluctuations, which could adversely impact our business, financial condition and operating results.

Changes in interest rates could significantly affect our financial condition and results of operations. If the interest rates for our existing or future borrowings increase significantly, our cost of servicing such debt will increase. This may negatively impact our results of operations, planned capital expenditures and cash flows.

66. There may be less information available in the Indian securities markets than in more developed securities markets in other countries.

There is a difference between the level of regulation and monitoring of the Indian securities markets and that of the activities of investors, brokers and other participants in securities markets in more developed economies. SEBI is responsible for monitoring disclosure and other regulatory standards for the Indian securities market. SEBI has issued regulations and guidelines on disclosure requirements, insider trading and other matters. There may be less publicly available information about Indian companies than is regularly made available by public companies in more developed countries pursuant to such disclosure requirements, which could adversely affect the market for our Equity Shares. As a result, investors may have access to less information about our business, financial condition, cash flows and results of operation, on an ongoing basis, than investors in companies subject to the reporting requirements of other more developed countries.

67. There is no public market for the Equity Shares or Equity Shares outside India.

After this Issue, there will continue to be no public market for our Equity Shares in the United States or any country other than India, we cannot assure you that the face value of the Equity Shares will correspond to the price at which the Equity Shares will trade subsequent to this Issue. This may also affect the liquidity of our Equity Shares and Equity Shares and restrict your ability to sell them.

68. Any trading closures at the Stock Exchanges may adversely affect the trading prices of our Equity Shares.

Secondary market trading in our Equity Shares may be halted by a stock exchange because of market conditions or other reasons. Additionally, an exchange or market may also close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted,

which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at a particular point in time.

69. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

1	Inventories	We maintain inventories at levels to achieve cost competitiveness and shorter lead times. We need to maintain inventory at efficient levels. As of September 30, 2022, & in Fiscal 2022, Fiscal 2021 and Fiscal 2020 our inventory days were 57 days, 46 days, 47 days and 43 days respectively. We have estimated 40 days of inventory for the Fiscal ended March 31, 2023 and 39 days of inventory for the Fiscal ended March 31, 2024, to ensure adequate availability of the raw material at a more competitive price. SECTION VI – ABOUT THE COMPANY OUR INDUSTRY

GLOBAL OUTLOOK

WORLD ECONOMIC OUTLOOK REPORT - OCTOBER 2022

The global economy is traversing a number of turbulent challenges. Inflation higher than in several decades, tightening financial conditions in most regions, Russia's invasion of Ukraine, and the lingering COVID-19 pandemic, all weigh heavily on the outlook. Normalization of monetary and fiscal policies that were unprecedentedly supportive during the pandemic is cooling demand as policymakers aim to lower inflation back to the targeted range. But a growing share of economies is in a growth slowdown or outright contraction. The global economy's future health rests critically on the successful calibration of monetary policy, the course of the war in Ukraine, and the possibility of further pandemic-related supply-side disruptions, for example, in China. Global growth is forecast to slow from 6% in 2021 to 3.2% in 2022 and 2.7% in 2023. This is the weakest since 2001 except for the global financial crisis and the acute phase of the COVID-19 pandemic, and reflects significant slowdowns for the largest economies: the US GDP contracting in the first half of 2022, a euro-area contraction in the second half of 2022, and prolonged COVID-19 outbreaks and lockdowns in China with a growing property-sector crisis. About a third of the world economy faces two consecutive quarters of negative growth. Global inflation from 4.7% in 2021 was forecast to rise to 8.8% in for 2022 but to decline to 6.5% in 2023 and to 4.1% by 2024. Inflation surprises have been most widespread in advanced economies, with greater variability in emerging market and developing economies. Risks to the outlook are unusually large and to the downside. Monetary policy could miscalculate the right stance to reduce inflation. Policy paths in the largest economies could continue to diverge, leading to further US dollar appreciation and cross-border tensions. More energy and food-price shocks might cause inflation to persist for longer. Global tightening in financing conditions could trigger widespread emerging market debt distress. Halting gas supplies by Russia have depressed output in Europe. A resurgence of COVID-19 or new global health scares might further stunt growth. A worsening of China's property sector crisis could spill over to its banking sector and weigh heavily on its growth, with negative cross-border effects. And geopolitical fragmentation could impede trade and capital flows, further hindering climate policy cooperation. The balance of risks is tilted firmly to the downside, with about a 25% chance of one-year-ahead global growth falling below 2%—in the 10th percentile of global growth outturns since 1970. Warding off these risks starts with monetary policy staying the course to restore price stability.

Front-loaded and aggressive monetary tightening is critical to avoid inflation de-anchoring as a result of households and businesses basing their wage and price expectations on their recent inflation experience. Fiscal policy's priority is the protection of vulnerable groups through targeted near-term support to alleviate the burden of the cost of living crisis felt across the globe. But its overall stance should remain sufficiently tight to keep monetary policy on target. Addressing growing government debt distress caused by lower growth and higher borrowing costs requires a meaningful improvement in debt resolution frameworks. With tightening financial conditions, macro prudential policies should be on guard against systemic risks. Intensifying structural reforms to improve productivity and economic capacity would ease supply constraints and, in doing so, support monetary policy in fighting inflation. Policies to fast-track the green energy transition would yield long-term payoffs for energy security and the costs of ongoing climate change.

Phasing in the right measures in the coming eight years will keep macroeconomic costs manageable. And last, successful multilateral cooperation will prevent fragmentation that could reverse the gains in economic well-being from 30 years of economic integration.

Inflation and Uncertainty

The world is in a volatile period: economic, geopolitical, and ecological changes all impact the global outlook. Inflation has soared to multi-decade highs, prompting rapid monetary policy tightening and squeezing household budgets, just as COVID-19-pandemic-related fiscal support is waning. Many low-income countries are facing deep fiscal difficulties. At the same time, Russia's ongoing war in Ukraine and tensions elsewhere have raised the possibility of significant geopolitical disruption. Although the pandemic's impact has moderated in most countries, its lingering waves continue to disrupt economic activity, especially in China. And intense heat waves and droughts across Europe and central and south Asia have provided a taste of a more inhospitable future blighted

by global climate change. Amid these volatile conditions, recent data releases confirm that the global economy is in a broad-based slowdown as downside risks.

The second quarter of 2022 saw global real GDP modestly contract (declining 0.1 percentage point at a quarterly annualized rate), with negative growth in China, Russia, and the US, as well as sharp slowdowns in eastern European countries most directly affected by the war in Ukraine and international sanctions aimed at pressuring Russia to end hostilities. At the same time, some major economies did not contract euro area growth surprised on the upside in the second quarter, led by growth in tourism-dependent southern European economies.

Forward-looking indicators, including new manufacturing orders and sentiment gauges, suggest a slowdown among major economies. In some cases, however, signals conflict—with some indicators showing output weakness amid labour market strength. An important factor underpinning the slowdown in the first half of this year is the rapid removal of monetary accommodation as many central banks seek to moderate persistently high inflation. Higher interest rates and the associated rise in borrowing costs, including mortgage rates, are having their desired effect in taking the heat out of domestic demand, with the housing market showing the earliest and most evident signs of slowdown in such economies as the US. Monetary policy tightening has been generally—though not everywhere—accompanied by a scaling back of fiscal support, which had previously propped up households' disposable incomes. Broadly speaking, nominal policy rates are now above pre-pandemic levels in both advanced and emerging market and developing economies. With high inflation, real interest rates have generally not yet reverted to pre-pandemic levels. Tightening financial conditions in most regions, with the notable exception of China, are reflected in a strong real appreciation of the US dollar.

In eastern and central Europe, the effects of the war in Ukraine have exacerbated the shifting global risk appetite. Beyond monetary policy alone, China's COVID-19 outbreaks and mobility restrictions as part of the authorities' zero-COVID strategy and Russia's invasion of Ukraine have pulled down economic activity. China's lockdowns have imposed sizable constraints domestically and gummed up already strained global supply chains. The war in Ukraine and deepening cuts to supplies of gas to Europe have amplified pre-existing stresses in global commodity markets, once more driving natural gas prices up.

INDIAN ECONOMY INSIGHTS

IBEF-Update December 2022, Strong economic growth in the first quarter of FY-2023 helped India surpass the UK to become the fifth-largest economy after it recovered from repeated waves of the COVID-19 pandemic shock. Real GDP in the first quarter of FY-2023 was about 4% higher than its corresponding FY-2020, indicating a strong start to India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in FY-2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitisation of tax filings. In the medium term, greater capital spending on infrastructure and asset-building projects is set to increase growth multipliers and, with the revival in the monsoon and *kharif* sowing, agriculture is picking up momentum. The contact-based services sector has largely demonstrated its promise to boost growth by unleashing pent-up demand over April-September, 2022. The sector's success is being captured by a number of HFIs (high-frequency indicators) that are doing well, indicating the beginnings of a comeback.

The economy grew 6.3% in the second quarter of FY-2023 following double-digit 13.5% growth in the first quarter. The slowdown was due to the normalisation of the base and a contraction in the manufacturing sector's output. However, both sequential improvement and good growth over the pre-pandemic level (Q2 FY-2020) signal the economy's resilience despite global growth and financial uncertainties.

Q2 FY-2023 GDP growth was only slightly higher than consensus expectation (6.2%) mainly because of higher-than-expected growth in trade, hotels, transport and communication-related sectors. Sequentially, domestic economic output expanded 3.6%, reversing the contraction in the previous quarter, with services gaining momentum. Compared to the pre-pandemic period, GDP recorded 7.6% growth, with broad-based recovery across sectors. Increasing discretionary spending and greater mobility have augured well for the services sector. The industrial sector's performance was pulled down by manufacturing, which contracted 4.3% (y-o-y).

Both private consumption and the investment rate edged up in Q2 FY-2023 compared with the corresponding quarter of the previous year and supported by greater economic activity. However, the global growth slowdown weighed on net exports. The agriculture sector grew 4.6% in Q2 FY-2023 compared with 3.2% in the corresponding quarter a year ago.

Q2 FY-2023 industrial output contracted 0.8% y-o-y, compared with 7% growth a year ago. This was mainly because of the poor performance of the manufacturing sector, marred by high input costs. We can expect the sector to fare well in coming quarters due to the festival-push and easing commodity prices. The services sector, with the highest proportion in GDP, recorded 9.3% growth in Q2 FY-2023 owing to the revival of contact-intensive

sectors. Output in sectors related to trade, hotels, transport, communications and broadcasting grew in double-digits (14.7%) benefiting from pent-up demand. Compared to the pre-pandemic period, however, these sectors were only slightly better.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world in the next 10-15 years, backed by its robust democracy and strong partnerships.

Stainless Steel Industry – Global & Indian Market

MARKET SIZE

India's FY-2022 nominal gross domestic product (GDP) at current prices is estimated at ₹ 232.15 trillion (US\$3.12 trillion). With more than 100 unicorns valued at US \$332.7 billion, India has the third-largest unicorn base in the world. Besides, the government is focusing on renewable sources to generate energy and is planning 40% of energy from non-fossil sources by FY-2030.

The McKinsey Global Institute says India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 to increase productivity and economic growth. The net employment rate needs to grow 1.5% a year from 2023 to 2030 to achieve 8-8.5% GDP growth between FY-2023 and FY-2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, was 2.1% of GDP in the first quarter of FY-2023.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Ahead, the contribution of merchandise exports may waver as several of India's trade partners experience an economic slowdown. According to one of the studies, Indian exports are expected at US\$1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments accounting for 70% of economic activity. With the improved in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to the World Bank, India must continue to prioritise lowering inequality while putting growth-oriented policies in place to boost the economy. In view of this, some developments have taken place in the recent past. Some are mentioned below.

- At September 21, 2022, India's foreign exchange reserves were US \$524,520 million
- Private equity-venture capital (PE-VC) investments were US\$2 billion in September 2022
- Merchandise exports in September 2022 were US\$32.62 billion
- PMI Services were comfortably in the expansionary zone, at 56.7, during April-September 2022
- In September 2022, the gross Goods and Services Tax (GST) revenue collection was Rs. 147,686 crore (US\$17.92 billion).
- Between April and June 2022, cumulative FDI equity inflows to India were US\$604,996 million.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. It has been effective in developing policies and programmes that only help citizens improve their financial stability but also for the overall growth of the economy. In recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides, a number of the government's flagship programmes, including Make-in-India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, aim to create immense opportunities in India.

ROAD AHEAD

In Q2 FY 23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) did well in July and August 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. In foreign direct investment inflows, India ranked fifth among developed and developing nations for the first quarter of 2022.

India's economic story in the H1 FY-2023 highlighted the unwavering support the government gave in the form of capital expenditure, which, in FY-2023 (until August 2022), was 46.8% higher than the corresponding period last year. The ratio of revenue expenditure to capital outlay fell from 6.4 in the previous year to 4.5 in this year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, greater profitability, and increasing economic activity contributed to rising capital spending.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August, CPI-C inflation was 7%, down from 7.8% in April. Similarly, WPI inflation fell from 15.4% in April to 12.4% in August. With a proactive set of administrative actions by the government, a flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India appear to be on the decline overall.

Our Industry

About Stainless Steel

Stainless steel is a generic term for the family of corrosion-resistance alloys. The metal derives its name because it does not stain, rust or corrode. Its properties are enhanced with other elements, molybdenum, nickel and nitrogen. Adding these elements produces a variety of SS grades for use in a range of industries.

One of this metal's unique features is that it can be re-used and re-cycled, making it environment friendly. Over 50% of new stainless steel is made from melted scrap making it a 'Green' metal. SS is dubbed a 'Wonder Metal' because of its distinguishing characteristics: low maintenance, weld ability, aesthetic appeal, durability, low life-cycle cost, good erosion- and corrosion-resistance. These make it an ideal material for many applications at various end-user sectors.

The basic use of stainless steel arises from its ability to resist corrosion. This results from adding chromium to iron: 10.5% added makes it corrosion resistant, on the formation of an oxide layer of chromium at the surface, which does not allow iron in the stainless steel to corrode. The formation of this layer is dynamic. If the surface is scratched or damaged, oxygen from the atmosphere re-forms the chromium oxide layer, a process known as re-passivation. Therefore stainless steel is protected all the time with this passive layer. This ability also reduces the use of corrosion-protection paints, saving costs and the environment.

Apart from corrosion resistance, other sterling properties of stainless steels make it a preferred choice to other competing materials for many industries.

DOMESTIC STAINLESS STEEL INDUSTRY

The India Stainless Steel Market

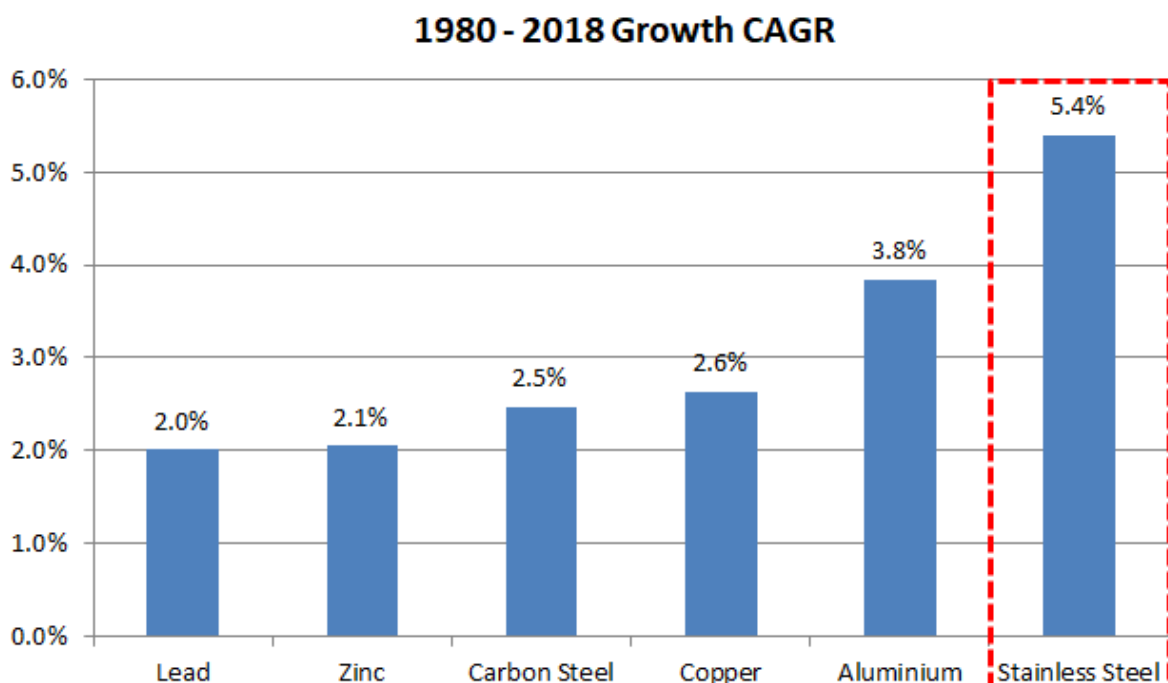

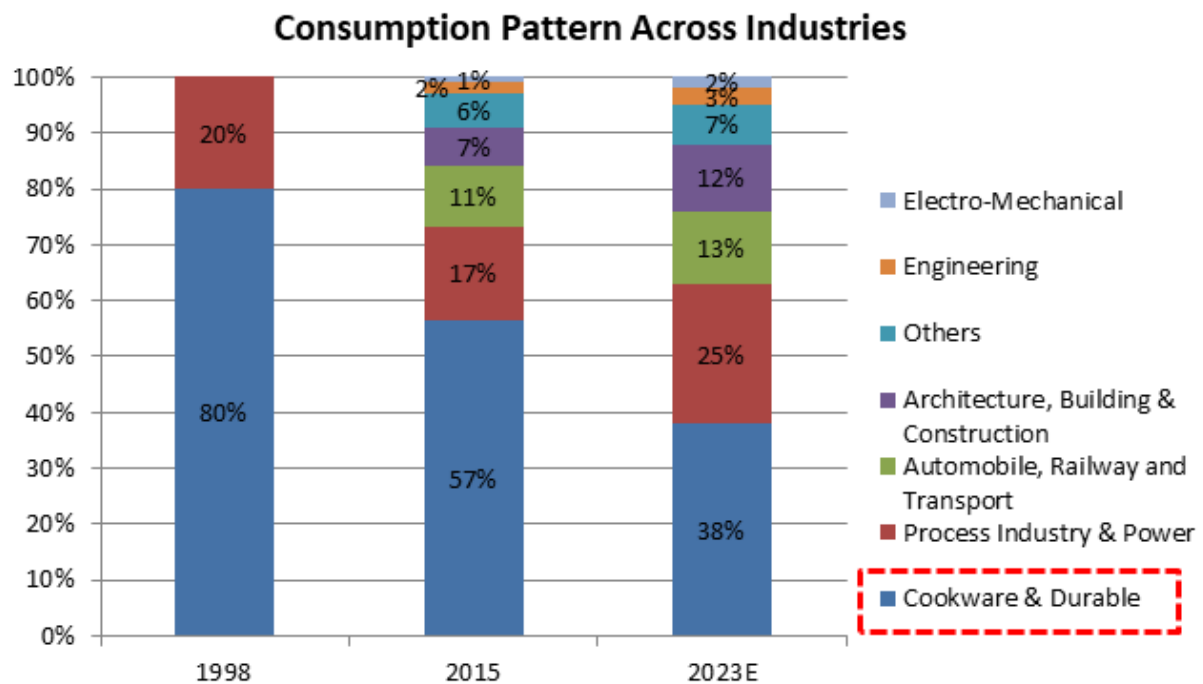

India's SS market was US\$9.67 billion in FY-2020, with an over 6.87% CAGR forecast by FY-2026, due to the metal's properties of corrosion resistance, tensile strength and durability. Rising demand for from consumer goods, construction and transportation is likely to drive market growth. And properties such as toughness, ductility and low maintenance have resulted in increased utilisation in consumer goods such as cookware, showpieces, and stoves, which in turn are anticipated to push product demand in coming years.

Moreover, increasing demand for stainless steel from various end-use industries, such as chemical, oil and gas, plumbing, energy and construction is predicted to drive the demand for stainless steel during the forecast period.

Some manufacturers of SS in India are Jindal Stainless, Jindal Stainless (Hisar), Viraj Profiles, Shah Alloys, Shyam Ferro Alloys, The Steel Authority of India, Tata Steel, Ambica Steels, Visa Steel, Laxcon Steels.

Consumption of SS has changed in the last couple of decades. It has not only been increasingly consumed at end-user industries, but has begun to be used in newer industries. This is one of the major reasons the metal growing at one of the fastest rates since 1980.

What Are Cold-Rolled Stainless Steel Strips?

End users' requirement of cold-rolled stainless steel strips is becoming increasingly strict in recent times. Unlike conventional hot-rolled stainless steel strips, precision cold-rolled stainless steel strips usually refer to stainless steel strips less than 0.30mm thick.

As a high-end product in stainless steel materials, precision cold-rolled stainless steel has excellent strength, precision, surface finish and other properties. It is widely used in heat exchangers, optical cables, hypodermic needles, diamond blades, and springs materials.

At present, the main production processes of cold-rolled stainless steel strips include cold rolling, bright annealing, tension straightening and finishing.

Advantages of Using Cold-Rolled Stainless Steel Strips

Compared with hot-rolled stainless steel strips, cold-rolled stainless steel strips has higher dimensional accuracy, low surface roughness, good surface quality, smoothness and greater strength.

Therefore, thinner cold-rolled stainless steel strips can be used instead of thicker hot-rolled strips for the same purpose to save the amount of material, which is of great economic significance.

Since its first cast in 1913, Stainless Steel has come a long way. Today, the versatile metal is widely used not only by heavy industries but practically by all small and medium industries that manufacture our day-to-day utility products, be it cooking utensils or high-precision electronic gadgetry. Demand in India for stainless steel is second to demand for textiles in terms of sheer magnitude. No doubt it is called the versatile metal because of its numerous applications and extraordinary properties.

Stainless Steel Characteristics

Stainless Steel has two main characteristics. All grades contain varying amount of chromium, possess a higher resistance to scaling at high temperatures.

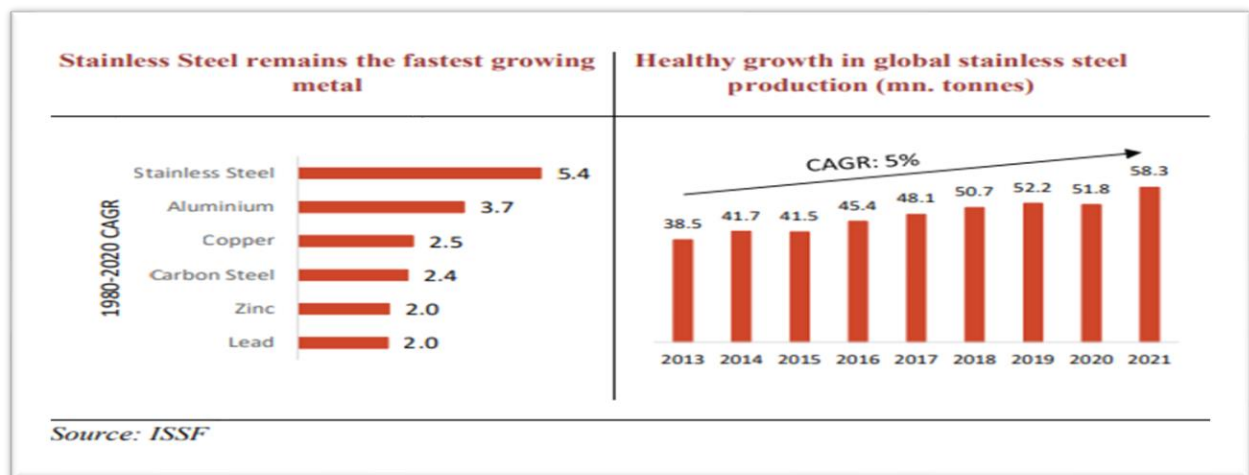

Stainless Steel is not a single material but a group of steels containing a minimum of 11% chromium with or without varying amounts of nickel, molybdenum, titanium and other elements.

IMPACT OF COVID-19 ON STAINLESS STEEL MARKET

The Global Stainless Steel Scenario

Stainless steel has been the fastest growing metal compared to aluminium, zinc, carbon steel, etc. with a 5.8% CAGR (per the International Stainless Steel Forum, ISSF). This can be attributed to its diverse use and greater replacement demand. Following a rising trend since 2015, global stainless steel melt-shop production was 52.2 million tonnes in CY19. The Covid-19 pandemic temporarily dented global stainless steel melt-shop production by 0.8% in CY20 to 51.8 million tonnes. However, in CY21, it turned around and registered impressive 12.51% growth over the previous year to 58.3 million tonnes, according to the ISSF in its publication.

FUTURE OUTLOOK

The Domestic Stainless Steel Scenario

According to the Stainless Steel Vision Document 2047, published by ISSDA and CRISIL, India will be the fastest growing stainless steel market and the second largest globally for the next several years. Infrastructure, renewable energy, agriculture, industry, “smart” cities, Defence, and aerospace are some sectors with great potential for stainless steel demand. Moreover, a prioritized approach to favour building long-lasting and maintenance-free infrastructure, and focusing on low life-cycle cost and value propositions are encouraging trends for the Indian stainless steel industry.

Further, the metal is expected to support nation-building and sustainable solutions across sectors where nearly 4% of the GDP is lost to corrosion every year. Over time, diverse use of stainless steel in India has increased, along with growth in conventional use. The trend continues with more new-age applications. A significant thrust by the government on infrastructure development and increase in awareness has also boosted stainless steel consumption. The scope for further growth is huge as India’s per capita consumption of stainless steel is just 2.5kg against a global average of 5.5–6kg.

After a dip in CY20, due to the Covid-19 impact, stainless steel melt-shop production in India bounced back in CY21 to 3.96 million tonnes, registering 26% growth over the previous year. Economic recovery and greater liquidity, post-lockdown, boosted a revival in demand, both in India and other regions. Railways, infrastructure, and process industries have been seeing greater demand and are likely to do better ahead. With the government’s sharp focus on infrastructure development and introducing promising projects viz. PM Gati Shakti, the life-cycle cost evaluation for project finalisation, replacement demand and growing awareness, stainless steel demand in India is likely to be robust.

Domestic demand for stainless steel clocked a compound annual growth of about 5.2% over fiscals 2016 to 2020 to 3.7 million tonnes. However, pandemic-led disruptions led to demand contracting 14-15% year-on-year in FY21 to 3.2 million tonnes. Domestic stainless steel demand bounced back to 3.96 million tonnes in FY22 supported by a low base, a relatively stable macro-economic environment, and normalised government spending. In the medium term, CRISIL expects stainless steel demand to register a 6.5–7.5% CAGR over FY 2022-25 to 4.6–4.8 million tonnes.

Further, CRISIL estimates this demand at 12.5–12.7 million tonnes by FY-2040 and 19–20 million tonnes by FY-2047. Consequently, per capita consumption is expected at 8–9 and 11–12 kg, from 2.5 kg now. Key contributor segments like construction, infrastructure and manufacturing are expected to drive this growth. Demand from the largest end-segment, consumer goods, is expected to be strong in future. Further, work-from-home culture will support the industry’s growth, boosting stainless steel demand for consumer durables. Also, the share of regulated manufacturers of kitchenware, a key component of consumer durables, is expected to have risen.

While industrial activity was hit in the past year, demand from processing industries is expected to rise with schemes such as ‘AtmaNirbhar Bharat’, ‘Make-in-India’, Production Linked Incentive (PLI), as well as a revival in investment. The food processing and pharmaceutical sectors are expected to be major end-users of stainless steel in process industries. Consumer goods (including kitchenware) account for 45% of demand for stainless steel in India, followed by process industries at 25%, with ABC contributing around 20% and ART around 9%-10% of the total mill-product demand. Automobiles, railways and transport (ART): CRISIL estimates demand from the ART segment contributed 10-11% of stainless steel demand in India in FY21.

Stainless steel demand from ART registered an 8-9% CAGR over FY15-FY20. After a drop of about 22% in FY-2021, demand in FY-2022 is expected to have jumped back to the FY-2020 level. While CRISIL estimates a 5.5% CAGR over FY22-FY25, it expects a faster, 7-8%, CAGR over FY25-FY30, driven primarily by a long-term revival in auto plus added demand from new age applications in the Railways.

Growth would be largely driven by the automobile segment and the rising penetration of stainless steel in the Railways, electric vehicles, bus bodies, fuel tanks, etc. Within automobiles, two-wheelers and passenger vehicles accounted for the major share of stainless steel demand. Collectively, these two sub-segments accounted for 85-90% of stainless steel consumption in ART. The Indian Railways has completely switched to LHB coaches, which have stainless steel shells. This makes up a significant proportion of the country’s demand for stainless steel. Use of stainless steel in coaches ensures safety and reliability through fire- and corrosion-resistance. Increasing penetration of stainless steel wagons and coaches, rising use of the alloy in rail infrastructure, proposed station modernisation and dedicated freight corridors (DFC) are expected to drive demand for stainless steel from the Railways. The overall stainless steel demand from automobile is envisaged at at 9-10% and 7-8% CAGRs over the medium and long term, respectively. Over FY22-FY25, stainless steel demand from other transport segments is expected to register a 8.5% CAGR.

Architecture, Building & Construction: The ABC sector is estimated to have accounted for 19-20% of the country’s FY-2021 stainless steel demand, registering an 11-12% CAGR over FY15-FY20. Of all stainless steel end-user industries, the fall in demand from the ABC sector was the least in FY-2021, estimated at 8-9% year-on-year. Also, demand in this sector is expected to swell by the highest rate (28-30%) in FY-2022, compared to other sectors. Demand is expected to clock a 6-7% CAGR over FY22-FY25, largely driven by residential, commercial, airport infra, water supply and sanitation (WSS), MRTS and commercial complexes. Further, ABC demand is expected at a ~10% CAGR on continued investments to one million tonnes by FY-2030. Further, the government’s emphasis on infrastructure modernisation would boost stainless steel demand in applications such as lifts, escalators, modular water kiosks, water ATMs, stainless steel benches, and mass rapid-transit systems (MRTS).

Process industry: Process industries accounted for 22-24% of stainless steel demand in India in FY-2021. Within this, food processing and pharmaceuticals were the major end-users of stainless steel. Demand here, according to a CRISIL Research, recorded an 8-9% CAGR over FY15-FY21. However, the Covid-19 pandemic slowed FY-2021 demand by an estimated 4-5% from the previous year. CRISIL Research expects stainless steel demand from process industries to register a 7-7.5% CAGR over FY22-FY30.

Consumer goods: Stainless steel demand from consumer goods (kitchenware and consumer durables) makes up 45-50% of overall stainless steel demand. CRISIL Research expects such demand from kitchenware to expand at a 6-7% CAGR over FY20-FY30. Sales of consumer durables logged a 7.8% CAGR over FY15-FY20. Slowing demand following the first Covid-19 wave curtailed sales in FY-2021. CRISIL Research envisages healthy demand growth for consumer durables in the long run, in tandem with sustained economic recovery. Growth would be driven by greater affordability, shorter replacement cycles, multiple ownership and low penetration. Global manufacturers are launching cost-effective models in India to boost mid-range sales. This is expected to alter the buying pattern of consumers who are more likely to move to new technology focusing on water and power saving. Demand over FY21-FY26 is expected to expand at an 11-13% CAGR.

Healthy demand outlook

Over time, stainless steel has seen many diverse applications in many industries along with consistent growth in conventional use. The Stainless Steel Vision Document 2047, released by The Indian Stainless Steel Development Association (ISSDA) in collaboration with CRISIL Research, expects India to be one of the fastest growing markets for stainless steel and maintain its second-largest consumer position in the world.

With the push for electric vehicles (EVs) and focus on fuel efficiency, more use of stainless steel can be expected in future. In the Railways, wagons, coaches and metro-rail projects are likely to drive stainless steel demand. The Indian Railways has completely switched to LHB coaches, which have stainless steel shells. Utilisation of stainless steel is expected to increase in building rail wagons and the super-structure of freight cars as more DFCs turn operational. In process industries, increased use of stainless steel is expected for containers, pipelines and tubes, heat-exchangers, food-contact equipment, storage tanks, condensers, processing and packaging machines, etc. In food processing, the hygiene factor renders stainless steel the most preferred material. In consumer durables, stainless steel is used in white goods, as it is corrosion-resistant, easily fabricated, has good mechanical properties over a wide range of temperatures, and can be given a host of exclusive finishes. Stainless steel properties, such as high degree of toughness and ductility, and low maintenance have increased its utilisation in consumer goods such as cookware, washing machines, refrigerators, delivery boxes and hard-disk covers. Many new-age applications of stainless steel across various segments are expected to arise in future. With the keen government focus on infrastructure, sustainability and increasing emphasis on health, hygiene and corrosion resistance, demand for stainless steel is likely to shoot up. In the medium term, CRISIL Research expects stainless steel demand to register a 6.5-7.5% CAGR over FY 22-25 to 4.6–4.8 million tonnes. In the long run (FY25 to FY30), CRISIL Research forecasts a 7-8% CAGR in demand to 6.6–6.8 million tonnes.

Government announcements influencing the stainless steel sector

The government's vehicle-scrapage policy is likely to benefit stainless steel makers. This will help in greater availability of local scrap from domestic scrapping facilities, reduce import dependence of scrap, and curtail the import bill. It will also aid steel makers in reducing lead times and provide flexibility in supply. In the Union Budget 2022-23, the government had temporarily withdrawn import duty on imports of scrap (stainless steel and mild steel) and nickel. This augurs well for scrap-based players in India, where scrap generation is low and when we fully depend on imports for the nickel we require. Further, the significant push to infrastructure including the emphasis on developing metro-rail projects and modernising rail infrastructure in different parts of the country and ports through the PPP mode are encouraging.

All these companies have a wide product portfolio, offering SAW, welded, seamless and stainless-steel pipes and tubes. Among these, Ratnamani and Jindal SAW have an established stainless steel pipes and tubes business. GST is a single tax on the supply of goods and services, right from the manufacturer to the consumer. Credits of input taxes paid at each stage will be available in the subsequent stage of value addition, which makes GST essentially a tax only on value addition at each stage. The final consumer will thus bear only the GST charged by the last dealer in the supply chain, with set-off benefits at all the previous stages.

Every person engaged in any profession, trade, callings and employment is liable to pay tax at the rate prescribed by the respective state government. A case titled Neoli Sugar Factory vs Quality Stainless for recovery of Rs. 1609462/-had been filed against Quality Stainless in the Civil Court at Kansiram Nagar (Kashganj) Uttar Pradesh in the year 2010. The said suit had been filed by the plaintiff for the refund of its above-mentioned amount. The suit has been contested by the company inter-alia on the ground that plaintiff had deposited this amount as 30% advance of its purchase order in order to manufacture/process the material as per the requirements of plaintiff such as size, thickness, length of material. After the manufacturing of goods plaintiff failed to take the delivery of the material after depositing the remaining balance (70%) amount. The material was manufactured specially as per the requirement of plaintiff and the said material was not of any use for any other buyer in the open market and as such in order to cover the loss of company advance amount deposited by the plaintiff can-not be returned because advance amount in any transaction is always taken in order to secure the manufacturer.

The said suit has been dismissed by the court on account of nonappearance of plaintiff on 30.09.2022. And as on today the said suit is non-existent. However, there are possibilities that the suit of the plaintiff may be restored in case of its reasoned written application to restore the same.

Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase has become applicable from January 1, 2019 and will continue till June 30, 2019. Under this phase, a Retail Individual Investor would also have the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing would continue to be six working days.

Phase II: This phase commenced on completion of Phase I, i.e., with effect from July 1, 2019 and was to be continued for a period of three months or launch of five main board public issues, whichever is later. Further, as per the SEBI circular SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019, the UPI Phase II has been extended until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount be continued till further notice. Under this phase, submission of the Application Form by a Retail Individual Investor through intermediaries to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six working days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three working days.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using the UPI Mechanism. The Issuer will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the Retail Individual Investors into the UPI payment mechanism.

The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government has from time to time made policy pronouncements on FDI through press notes and press releases. The DPIIT issued, issued the Consolidated FDI Policy Circular of 2020 (“FDI Policy”), which, with effect from October 15, 2020, subsumes and supersedes all press notes, press releases, clarifications, circulars issued by the DPIIT, which were in force as on October 15, 2020. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction/ purview, such subsequent change in the beneficial ownership will also require approval of the Government. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020 issued on December 8, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank or fund in India.
